COYOTE® DTC4/DTC6 (Drop Termination Closure)

**Description**
Identifying closure systems to protect the final connection point in your FTTH network is critical. Selecting one packed with features to support splicing, connectivity or ducting applications, using traditional cable, blown fiber, pushable drop cable technology or microtube cable, with a footprint slightly larger than a splice tray, has been impossible; until now.

The COYOTE DTC4 and DTC6 are the latest additions to the DTC (Drop Termination Closure) Family. Like the original DTC, these closures offer a durable, compact solution with multiple internal fiber organizers to support your current and future needs. Network evolution is unpredictable so why not choose a closure system developed to adapt.
