COYOTE® Dome Slide Closure with Flip Trays for 6-1/2" x 17" (165 x 432 mm)

Be sure to read and completely understand this procedure before applying product. Be sure to select the proper PREFORMED product before application.

NOMENCLATURE
1. Dome cover (1)
2. Organizer with 4-Port End Plate Assembly (Expanded Storage Version Shown)
3. Dome collar (1)
4. Dome gasket (1)
5. Hose clamp (4)
6. Cable grommet (2)
7. Silicone lubricant (4 five gram pkgs)
8. Disposable glove (1)
9. Bracket Support (2)
10. Bracket Support Small (2)

TOOLS REQUIRED
- 3/8" & 7/16" Can wrench or socket
- 1/4" Nut driver or screwdriver
- Snips
- Fiber optic cable opening tools

**NOTE:** Grommet Kit contains (1) Grommet, (1) Cable Measure Tape, (2) Silicone Lubricant Packs, (1) Set of Plugs & (1) Glove
End Plate Preparation

**Step #1a** Remove end plate from organizer assembly.

**Step #1b** Remove the end plate caps from the selected cable ports and break out the tabs.

**PLP Tip:** Scoring edges of tabs with knife makes them break out easier.

**Step #2** **OPTIONAL STEP**
For better stability during cable installation and fiber splicing, install the end plate onto the COYOTE® Dome End Plate Fixture (**see Steps 3a-b for installation details**).

**Step #3a** **OPTIONAL STEP**
Install support bracket onto base.

Step #3a Diagram:
- Position support bracket onto base and secure with wing nuts.
- Base can be secured to work surface with either clamps or with bolts.

**NOTE:** Do not tighten wing nut until end plate is installed.

**Step #3b** **OPTIONAL STEP**
Seat the end plate onto the cushion wedges and secure support bracket to stud of end plate.

Step #3b Diagram:
- The outside surface of the end plate must rest against the support bracket.
- Support Bracket
- Hand tighten any loose wing nuts to secure end plate to fixture.

**Step #4** Lay cable into entry point and mark for grommet and sheath opening locations.

**PLP Tip:** Hole in strength member bracket is a guide for sheath opening.
**Step #5** Measure cable to determine diameter.

**Step #6** The 2 hole wide range grommet is designed to support a cable installed in one hole and a plug installed in the unused hole. Installing cables in both holes is not recommended.

**Step #6a** If using cut cable, insert cable through grommet. If your application requires express/balloon/ring cut cables, see Step 7 for grommet slitting procedure.

**Step #6b** Installing Figure 8 Style Cables and Cables with Tracer Wires – Remove tracer wire or ground wire from the portion of the cable that will be positioned in the grommet and insert cable into grommet.

**Figure 8 Style Cable**

**Step #7** Grommet Slitting – If slitting is required, lay grommet on a stable flat surface. Position utility knife with the cutting edge against the top surface and cut through grommet. Consult grommet chart on page 2 for slitting locations of all grommets.

**PLP Tip:** Use a pen to sketch slitting lines on top surface of grommet prior to cutting.
### Minimum Sheath Opening for Cut Cable Applications

</table>

### Step #8a
Trim strength members to length. Prepare cable(s) for cut applications.

### Step #8b
Prepare cable for mid-sheath applications (Express/Balloon/Ring Cut).

### Step #8c
Prepare cable for mid-sheath applications (Express/Balloon/Ring Cut).

### Step #8d
Prepare cable for expressed fiber (buffer tube window cut) applications.

### Step #9
If shielded cable is being used, install shield connector on shielded cables. See Step #17 for recommended bonding practice.

Follow standard company practices.
Step #10a  Lubricate the outer surface of the grommet.

Lubricate sealing surface of grommet with silicone lubricant provided.

Step #10b  Position grommet in end plate slot.

IMPORTANT NOTE:
For Wide Range 2-Hole Grommets, make sure arrows are pointing down when inserting grommet(s).

IMPORTANT NOTE:
Do not align grommet slit with end plate seam.

Step #11  Install cable cap and secure with hex bolts. Tighten bolts by hand evenly until cable cap is fully seated.

PLP Tip:
To start cable cap bolts, apply pressure with thumb and line up bolts with inserts. Engage 1 or 2 threads on one of the bolts. Repeat process on opposite bolt. Alternate tightening until fully seated.

IMPORTANT NOTE:
TIGHTEN ALL UNUSED CABLE CAPS.

Step #12  Complete end plate assembly.

Step #13  Secure organizer assembly to end plate with 1/4" hex bolt and hex nut.

Step #14  Trim cable strength member(s) even with the edge of the cable restraint bracket. Secure strength member(s) under clip and tighten screw.
Step #15  Secure cable sheath with hose clamp.

PLP Tip:
Avoid contact between hose clamp and shield connector to maintain isolation of each cable ground.

Step #16  Attach bonding device between the cable and ground stud in the end plate and ground per your accepted company practice.

Step #17  Route and store buffer tubes in storage brackets.

Step #18  Route buffer tubes or transport tubes to splice trays and secure.

NOTE: Wrap felt tape around buffer tubes in area where they will be tied down to splice tray.

Step #19  Route incoming and outgoing fibers and splice per standard company practice.

Step #20  Secure splice trays with hold down strap.
Dome Preparation and Installation

Step #21 Lubricate all surfaces around gasket with silicone lubricant to assure easy assembly and closure re-entry.

Lubricate all inner surfaces of the gasket.

Step #22 Slide end plate gasket onto end plate and press into groove.

NOTE: Make sure gasket is seated in groove of end plate.

Step #23 Re-tighten all cable cap bolts (Step #12) to assure that the cable caps are fully seated.

Step #24 Position dome over end plate and insert organizer assembly into dome.

Step #25 Install dome collar.

Flash test to 5 psi max.

Dome Preparation and Installation

Step #26 COYOTE® Universal Mounting Bracket for Hand Hole Applications. The COYOTE Dome Closure can be installed in a hand hole using the COYOTE Universal Mounting Bracket (Cat. No. 8003835). Secure the Universal Mounting Bracket to the inner wall of the hand hole using 2 screws. Next, insert banding (plastic or metal) through the slots of the hanger brackets (#1) and position the brackets in the banding channels of the dome. Tighten the banding until the brackets are secure (#2). Lastly, slide the hanger brackets into the proper slots of the Universal Mounting Bracket and snap the hinged lid into place to secure the hanger brackets (#3).
Step #27a Dome Aerial Mounting Bracket – Dome Mount – for 6.5" x 17" (165 x 432 mm) or 22" (558 mm) Dome Closures. The COYOTE® Dome Mount Aerial Bracket Kit (Cat. No. 8003831) can be used to suspend the COYOTE Dome Closure from the messenger wire. To install the dome mount aerial brackets, position the brackets in the banding channels of the dome and insert banding (plastic or metal) through the slots of the brackets. Tighten the banding until the brackets are secure before mounting the closure to the messenger wire with the bug nuts of the brackets.

Step #27b 6.5" x 17" (165 x 432 mm) or 22" (558 mm) Dome Mount Aerial Bracket – Dome Mount – for ADSS. The COYOTE Dome Mount Aerial Bracket Kit for ADSS (Cat. No. 8003833) can be used to suspend the COYOTE 6.5" x 17" or 6.5" x 22" Dome Closure from ADSS cable. To install the dome mount aerial brackets, position the brackets in the banding channels of the dome and insert banding (plastic or metal) through the slots of the brackets. Tighten the banding until the brackets are secure before mounting the closure to the ADSS cable with the ADSS clamp.
Step #28a  The COYOTE® Dome Pole/Wall Mount Bracket (Cat. No. 8003702) can be used to secure the COYOTE Dome Closure to wood, concrete, or steel poles. The COYOTE Dome Pole/Wall Mount can also be used in conjunction with the FIBERLIGN® Lattice Tower Clamp (Catalog No. 7000400) for lattice tower application. Secure the dome stud mount to the end plate studs of the dome and secure the dome stud mount to the dome pole mount. Attach the dome pole mount to the pole with either 5/8" through bolts or 1/4" lag screws.

Step #28b  For an installation similar to the previous one using fire retardant closures, it comes with the same instructions adding a support to the distance of each closure between the wall or surface of the post.
SAFETY CONSIDERATIONS

This application procedure is not intended to supersede any company construction or safety standards. This procedure is offered only to illustrate safe application for the individual. FAILURE TO FOLLOW THESE PROCEDURES MAY RESULT IN PERSONAL INJURY OR DEATH.

Do not modify this product under any circumstances.

This product is intended for use by trained technicians only. This product should not be used by anyone who is not familiar with, and not trained to use it.

When working in the area of energized lines, extra care should be taken to prevent accidental electrical contact.

For proper performance and personal safety, be sure to select the proper size PREFORMED™ product before application.

PREFORMED products are precision devices. To insure proper performance, they should be stored in cartons under cover and handled carefully.
