Coated Side Tie
FOR SIDE GROOVE, SINGLE INSULATOR INSTALLATIONS

Be sure to read and completely understand this procedure before applying product. Be sure to select the proper PREFORMED™ product before application.

CONDUCTOR COLOR CODE
(Identifies conductor size range)

Coated Side Tie as received in the field.

IMPORTANT: Coated Side Ties are intended for use with plastic jacketed conductors. Their performance is significantly influenced by the line design, voltage, insulators and environmental conditions. Consequently, the user should determine the suitability of Coated Side Ties for the intended installation.

HAND APPLICATION

Step #1  Approaching the insulator from the side away from the conductor, position the center of the PREFORMED™ Coated Side Tie over the center of the insulator.

Step #2  Hold the legs as shown. Wrap the right leg of the Coated Side Tie over and behind and then around the conductor. At the same time, hold the left leg of the tie upward toward the conductor as shown.
Step #3  Wrap the right leg completely on the conductor.

Step #4  Using slight thumb pressure, snap the end of the leg into place. **MAKE SURE TIE LOOP IS TIGHT ON INSULATOR NECK AND UNDER INSULATOR HEAD.**

Step #5  Wrapping the left leg under and then over the conductor, install it completely as illustrated below, ensuring to snap in the ends.

Step #6  Completed application of the PREFORMED™ Coated Side Tie.

SAFETY CONSIDERATIONS
This application procedure is not intended to supersede any company construction or safety standards. This procedure is offered only to illustrate safe application for the individual. **FAILURE TO FOLLOW THESE PROCEDURES MAY RESULT IN PERSONAL INJURY OR DEATH.**

This product is intended for a single (one-time) use and for the specified application. **DO NOT REUSE OR MODIFY THIS PRODUCT UNDER ANY CIRCUMSTANCES.**

This product is intended for use by trained technicians only. **This product should not be used by anyone who is not familiar with, and trained in the use of it.**

When working in the area of energized lines with this product, extra care should be taken to prevent accidental electrical contact.

For proper performance and personal safety, be sure to select the proper size PREFORMED™ product before application.

PREFORMED products are precision devices. To insure proper performance, they should be stored in cartons under cover and handled carefully.
