

RISER CABLE SUPPORT

The **Riser Cable Support** is intended to support riser cables transitioning from underground service to overhead service on the distribution utility pole. Riser cables are commonly seen supported at the top of the riser by metal mesh socks, which have a tendency to corrode.

PLP's Riser Cable Support is made from corrosion-resistant PVC plastic that uses high-quality UV stabilizers. The helical legs of the Riser Cable Support create a strong and secure fit over a wide range of cable diameters and are installed directly above the conduit or U-guard. This assists in the prevention of damage to the cable while supporting its weight without the need for multiple metal clamps.

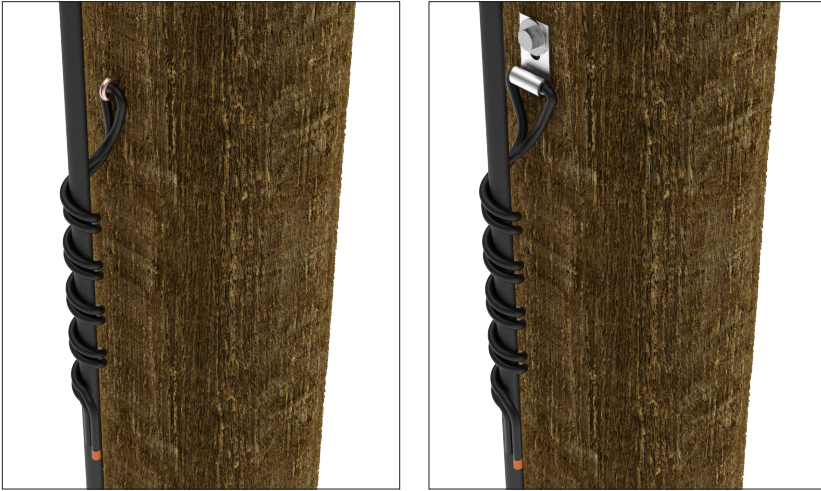

The Riser Cable Support can be supplied with or without an aluminum bracket that attaches it to the pole or riser. This allows for compatibility with various attachments to the utility pole. Common attachments include a standard J-Lag Hook or a simple lag bolt.

FEATURES AND BENEFITS

- Fully UV stabilized
- Easy to install
- No tools required
- Fits a wide range of cable diameters
- Cost effective
- Lightweight

RISER CABLE SUPPORT

Catalog Number		Cable Range (in)	Units	Weight (lb)	Length (in)	Color Code
Bracket	No Bracket		Per Carton			
RCS-0416	RCS-0416N	0.296 - 0.400	50	18	16	White
RCS-0417	RCS-0417N	0.401 - 0.560	50	19	16	Green
