

# BIRD PERCH DETERRENT™

## NOMENCLATURE

### BIRD PERCH DETERRENT

Davit Arm

Angle

**Spacing:** Approximately 8" between deterrent uprights

**Color:** Gray

**Material:** Outdoor grade polyvinyl chloride (PVC)

**Crossarm Dimensions:** 3.25"(W) x 4.25"(H) up to 3.75"(W) x 4.75"(H)

**Thermal Rating:** 125°C Continuous

## GENERAL RECOMMENDATIONS

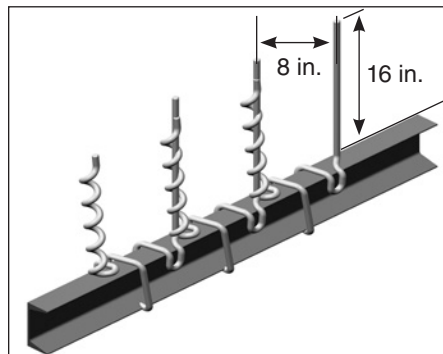

The BIRD PERCH DETERRENT is designed to provide protection from incidental avian contact with overhead distribution lines. It provides an economical means of reducing bird fatalities and line outages while being easily installed over distribution crossarms.

The BIRD PERCH DETERRENT is lightweight, offers little wind resistance and is easily and quickly installed by hand or by hot stick. The BIRD PERCH DETERRENT will remain in its applied location and will not move along the crossarm due to Aeolian vibration or other conditions.

**Materials:** The BIRD PERCH DETERRENT is manufactured from outdoor grade polyvinyl chloride (PVC) possessing excellent chemical and strength properties and will retain good physical characteristics within a range of extreme temperatures. Industrial fumes and salt water won't degrade the properties of rigid PVC.

## APPLICATIONS

**Spacing:** A minimum of two BIRD PERCH DETERRENTS are required to ensure proper application. Each BIRD PERCH DETERRENT has approximately an 8" spacing between the uprights. Calculate the number required for the distance between insulators and/or pole.
