

## WEDGE-GRIP™ DEAD-END

**WEDGE-GRIP Dead-Ends** are designed to simplify the costly, labor-intensive job of cabling trees. The simple housing and wedge assembly terminates EHS and common grade strand by simply sliding over it, and with initial tension, the strand is held in place. The WEDGE-GRIP Dead-End eliminates the need to modify the strand or alter its integrity in any way. The result is a reliable cable termination that maintains 100% of the published rated breaking strength of the strand, and it takes only seconds to apply.

### FEATURES AND BENEFITS

- Simple to use – slides over the strand
- Maintains strand integrity – no opening or altering of strand
- Designed to hold 100% of the rated breaking strength of both EHS and common grade strand
- Does not harm trees
- Arrives pre-assembled
- Color-coded wedges match EHS and common grade strand sizes
- Quick and easy installation
- No special tools needed – hand tightened
- Easy to adjust
- Compact design is ideal for tree crotch and tight spaces
