Installing Mid and End Clamps

Clamps are attached to the Rails using 5/16” RAD Bolts and Flange Nuts.

**Mid Clamps**
Mid Clamp tabs must rest between the Modules.

Parts:
1. 5/16” Flange Nut
2. Mid Clamp
3. 5/16” RAD Bolt (length depends on module thickness)

**End Clamps**
Make certain that End Clamps are installed as shown and not upside down.

Parts:
1. 5/16” Flange Nut
2. End Clamp
3. 5/16” x RAD Bolt (length depends on module thickness)

**Torque:** 14-16 ft.-lbs.
