

Telegrip

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

Telegrips are designed for service drop applications of coaxial cables. Flexible but firm, Telegrips exceed mechanical holding requirements for coaxial cable.

Features

- Exceed mechanical holding requirements for coaxial cable
- Long length design reduces stress levels
- Unique gripping principle prevents bending that can cause "snow" or distortion of the television picture.
