

Protector Tubing

Be sure to read and completely understand this procedure before applying product. Be sure to select the proper PREFORMED™ product before installation.

IMPORTANT SAFETY CONSIDERATION

Protector Tubing is intended as a covering to protect against incidental wildlife contact with an energized wire or conductor and should not be considered as insulating protection against human contact.

STEP #2 Open up one end of the Protector Tubing and wrap it around the conductor. Slide or wrap the remaining length of tubing on the line.

Applying the Protector Tubing

STEP #1 Measure and cut the protector tube to desired length. Use a knife or scissors.

STEP #3 Completed application shown below.

SAFETY CONSIDERATIONS

This application procedure is not intended to supersede any company construction or safety standards. This procedure is offered only to illustrate safe application for the individual.

FAILURE TO FOLLOW THESE PROCEDURES MAY RESULT IN PERSONAL INJURY OR DEATH.

This product may be removed and reinstalled during the initial installation if it is in good condition. After extended service of life, it is recommended the product not be reused once removed from service.

Modify this product as outlined in this application procedure only.

This product is intended for use by trained technicians only. **This product should not be used by anyone who is not familiar with, and not trained to use it.**

When working in the area of energized lines, extra care should be taken to prevent accidental electrical contact.

For proper performance and personal safety, be sure to select the proper size PREFORMED product before application.

PREFORMED products are precision devices. To insure proper performance, they should be stored in cartons under cover and handled carefully.
