

POWER BOX™

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Short Description

Description

POWER BOX™ Enclosures are custom designed for pole, pad or wall mount applications and provide maximum protection for your specified equipment. The high strength, yet lighter weight aluminum construction includes welded seams for supporting heavier electrical and electronic components. Designed to NEMA 3R requirements for dust and water protection, the enclosures feature powder coating and stainless steel hardware for long term reliability. POWER BOX enclosures meet a variety of industry applications and provide equipment protection for the harshest environments.

Features

STYLES AND OPTIONS
