

# COYOTE® Taut Closure

## Refinement of the Breed...

**A single closure that simplifies branch cable taps or repairs of taut fiber optic cables.**

The 6.5" x 38" (165 x 965 mm) COYOTE Taut Closure organizes and protects up to 12 branch splices in either or both directions, or up to 12 pairs of fiber splices for repairing damaged cable.

The end plates are the same innovative design used in the COYOTE Dome Closure and employ the easy-to-use grommet system which can also be used in the COYOTE Taut Closure.

The unique mainframe assembly protects the fibers being "expressed" through the closure and organizes the splices on those fibers being spliced to the branch cables. Slack fibers from the branch cables or slack fibers between repair splices are stored in the center region of the mainframe. The entire splice is protected by our rugged plastic COYOTE shells.
